~~ubeva~~

The diagram shows a circuit with a battery at the top, labeled "CH". A switch is connected to the positive terminal of the battery, labeled "ON" and "BAND". The switch is currently open. Below the switch is a rectangular component representing a bulb or resistor, labeled "3d". An arrow points downwards from the bottom of the bulb towards the negative terminal of the battery. The entire circuit is drawn on a grid background.

$\Delta = ?$
